Get Stolen Laptops Back

When your computer is stolen, your LoJack for Laptops gives you the power to remotely locate, lock and delete the data on your computer before it falls into the wrong hands. Most powerful of all, only LoJack for Laptops has a dedicated Theft Recovery Team that works with local law enforcement to recover your stolen laptop and return it to you.

Lojack Features

- The locate screen allows you to instantly track your laptop's most recently recorded location and view its location history.
- The lock tab lets you issue a remote command to freeze your lost or stolen computer. You can also create a customized message to display on your computer's screen to help someone who finds it return it to you.
- Go to the delete tab to remotely erase files on your computer. You can opt to delete all of your files, or just certain file types. The next time your laptop contacts the Monitoring Center, it receives the delete command and erases the files you selected.
- Finally, if you suspect your laptop has been stolen, report it to the police. Then log in to the Lojack Customer Center to alert the Theft Recovery Team. They use advanced forensic technology to locate the laptop and possibly identify who has it. They share this information with local law enforcement, who recover the computer.

What is Lojack for Laptops?

Lojack for Laptops is an anti-theft security package that can be embedded into a computer's basic input/output system (BIOS) and installed onto the hard drive of the computer system. In the event that the computer is stolen, the application will continue to attempt to contact the monitoring center and can report back with specific information to trace the location of the stolen computer once it connects to the internet.

Access the Lojack website at:

Synopsis

LoJack for Laptops by is a software-based theft recovery and data security service. In the event of theft — LoJack for Laptops can track, locate, and recover stolen computers while providing you with the ability to protect your personal information against identity theft.

Your laptop is a vast resource, and is loaded with your media files, personal photos, correspondence and documents, not to mention personal information that could serve as a gold mine for an identity thief.

Should your computer go missing, LoJack for Laptops makes sure you have the power to recover it. Be prepared for a theft and stay one step ahead with the innovative tracking and recovery tools of LoJack for Laptops.

When you can determine where your computer is — and who has it — you have the power to stay in control, even when your laptop is taken out of your reach.

LoJack software safely and securely tracks and manages your computer in the case of an emergency.

LoJack for Laptops software easily installs in your computer's firmware and maintains a connection with a Monitoring Center to help keep tabs on your computer's location.

If your computer is stolen, the Theft Recovery Team will forensically mine the computer the next time it connects to the Internet to discover who has it and where it can be found.

Combining pinpointing technologies with advanced investigative methods like key captures, registry scanning, file scanning and geolocation, the Theft Recovery Team works with local law enforcement agents to get your laptop back where it belongs — in your hands.
