Albany State University
Graduate Research Symposium
Informing and Strengthening Communities Through Research
June 30, 2021

Call for Abstracts!

Albany State University's Office of Graduate Studies in collaboration with the Masters Reality-based Enhanced and Applied Learning (REAL) Program presents a Graduate Research Symposium to highlight innovative research conducted by faculty and graduate students across disciplines. The symposium will feature oral and poster presentations that summarize specific research projects and/or findings. It offers graduate students an opportunity to share their research experiences with the larger academic community. The symposium also provides a forum for graduate students, faculty, and community partners to discuss research needs and priorities for the region and collaborative opportunities to engage in this research.

Faculty and graduate students are invited to submit a proposal to present at the Graduate Research Symposium. All presenters must follow a prescribed template for poster presentations, but graduate students should complete their proposal submission and poster presentation under the guidance of the graduate symposium faculty mentor for each college.

To Submit an Abstract – Opening March 1, 2021

Complete the proposal application found at Graduate Research Symposium Call for Proposals (smartsheet.com)

Deadline for Submissions March 26, 2021
