

HSEC 2153 Theories of Terrorism: Analysis through Case Studies (3-0-3)

The course will present a format of the most sophisticated theories by the best terrorist analysts in the world, while still focusing on the domestic and international threats of terrorism and the basic security issues that surround terrorism today. Students will demonstrate their understanding of the strategies and principles gained through previous courses by conducting an analysis of these articles in the context of current U.S. strategies and programs.

Prerequisites: HSEC 2114, National Response Plan; HSEC 2123, Terrorism and Homeland Security.

Corequisite: None.

Technology: 100% online.

Offered: On demand.

HSEC 2159 Information Security (INFOSEC) (3-0-3)

Information security transcends all national borders and reaches out from the global network. Whether at the local, state or national level and including the private sector, critical information must be shared across internet and intranet as a principal part of required daily procedures. As a result, these institutions are vulnerable to cyber attacks by domestic and international terrorists as well as foreign business competitors. The prevention of intrusion, data theft and data loss is paramount to maintaining the security of public infrastructure, protecting sensitive information and providing essential services to both the private and public sector. This course will examine topics such as asset identification, human factors, compliance with regulations, personnel security, risk assessment and ethical considerations as well as computer and network security tools and methods. It will provide an up-to-date look at the whole range of security and information topics. In post-9/11 times, managers and IT Professionals need to address a wide range of security-related issues, and develop security systems that take all these diverse factors into account.

Pre or Corequisite: HSEC 2109.

Technology: 100% online.

Offered: On demand.

HSEC 2164 Corporate Security (3-0-3)

This course outlines the essential roles of corporate & municipal managers & demonstrates the importance of their relationships with federal, state, & local government agencies as well as public and private community sectors in conducting emergency planning. The focus is on proactively planning for emergencies, particularly in the recognition & advance coordination of response to incidents instead of simply implementing emergency measures. Topics include the overall scope of comprehensive emergency planning; the types of hazards & risks faced by emergency response personnel, as well as the public, in typical emergencies; & provide specific recommendations regarding the immediate & long-term health & safety of emergency response personnel. Finally, coursework will discuss a range of issues that must be given special attention in the development & implementation of any emergency response plan including: hazard & risk reduction, decontamination, data & information management, monitoring strategies & devices, terrorism, & the training of emergency response personnel.

Pre or Corequisite: HSEC 2109.

Technology: 100% online.

Offered: On demand.
