

S. DRUG SCREENING

Some clinical affiliates may require random drug screens during clinical rotations. In order to participate in this clinical environment, the student must complete this requirement following the mechanism determined by the facility. The results of such screenings (if required) are submitted directly from the student to the clinical affiliate. The student will be responsible for the cost of this requirement. The clinical affiliate determines whether or not a student can participate in the clinical rotation based upon the results of this drug screen. All nursing students will be required to complete a 10-panel drug screen on admission and randomly throughout the nursing program.

T. HEALTH SCIENCES STUDENT TRAVEL POLICY

Depending upon the particular Health Science and Nursing program that the student is attending, students may be required to participate in clinical affiliations and educational experiences that necessitate travel. If clinical education is a component part of the program attended, all aspects of this requirement must be successfully completed. Students may be required to travel significant distances to fulfill clinical obligations. Students are responsible for their own transportation, food and lodging expenses during clinical affiliations, rotations or experiences.

U. PREVIOUS ACADEMIC HISTORY IMPACTING HEALTH SCIENCE and NURSING PROGRAM ADMISSION

Previous unsuccessful participation in Health Science or Nursing programs will be considered in the admission process for students attempting to return to a program and those seeking enrollment in a different Health Sciences program. Also, any student's academic history, including a record of excessive withdrawal or unsuccessful attempts in general education course work, may result in the denial of admission to a Health Sciences program.
