1. Recommends that MATH 1101: Math Modeling be addressed in the catalog for the new ASU as follows:

**Title: MATH 1101: Math Modeling - eCore only**

**Course Description:** This course is an introduction to mathematical modeling using graphical, numerical, symbolic and verbal techniques to describe and explore real-world data and phenomena. Emphasis is on the use of elementary functions to investigate and analyze applied problems and questions, supported by the use of appropriate technology, and on effective communications of quantitative concepts and results. *MATH 1101 may be taken as a substitute for MATH 1001: Quantitative Reasoning.*

2. Recommends implementing the following course description and prerequisites for MATH 2008 – Foundations of Numbers and Operations:

**Course Description:** This course is an Area F introductory mathematics course for teacher education majors. This course will emphasize the understanding and use of the major concepts of number and operations. As a general theme, strategies of problem solving will be used and discussed in the context of various topics.  
**Prerequisites:** MATH 1001, MATH 1111, MATH 1113 or approved equivalent.
