ACADEMIC & STUDENT AFFAIRS HANDBOOK

Procedural guide for implementing BoR policies related to Academic Affairs

2.4 Core Curriculum

(Last Modified on July 8, 2016) [Report a broken link](#)

/academic_affairs_handbook/contact_information/

SOURCES:

[BoR POLICY MANUAL 3.3.1, CORE CURRICULUM](#)

[\(/policymanual/section3/policy/3.3_curriculum/#p3.3.1_core_curriculum\)](/policymanual/section3/policy/3.3_curriculum/#p3.3.1_core_curriculum)

[BOARD OF REGENTS MINUTES, 10/14/2009](#)

[\(/regents/documents/board_meetings/octmin09.pdf\)](/regents/documents/board_meetings/octmin09.pdf)

EFFECTIVE DATE: ALL INSTITUTIONS WILL IMPLEMENT THIS POLICY NO LATER THAN FALL 2011 BUT MAY IMPLEMENT IT EARLIER. HOWEVER, IN ORDER TO ALLOW FOR CURRICULAR ALIGNMENT WITH FOUR-YEAR INSTITUTIONS, TWO-YEAR INSTITUTIONS MAY DELAY IMPLEMENTATION UNTIL FALL 2012.

2.4.1 General Education Learning Goals

(Last Modified on July 8, 2016) [Report a broken link](#)

/academic_affairs_handbook/contact_information/

The University System of Georgia (USG) is a composite of diverse institutions that, in spite of their diversity, require System-wide coherence to facilitate success for transfer students. To achieve these ends, the USG outlines general education learning goals that serve as guides for each institution to develop its own general education learning outcomes. Each institution is required to develop one or more learning outcomes for each learning goal. Instead of presenting the learning goals with descriptions or specific required outcomes, examples of learning outcomes that would fall under each learning goal are provided.

The learning outcomes for Goals A–E developed by institutions must be approved by the Council on General Education. All learning outcomes must be collegiate level, not skills-based, and broadly focused. They must be consistent with the learning goals and with the mission of the USG.

The academic advisory committees will specify learning outcomes for each Area F. These learning outcomes must be collegiate level and provide an appropriate base for later learning outcomes in the relevant degree program. They must be consistent with the mission of the USG.

Per the USG Comprehensive Program Review Policy (BoR Policy 3.6.3, Comprehensive Academic Program Review), the assessment of general education learning outcomes is required at all institutions and must be a part of each institution's regular report on comprehensive program review posted on the institution's Comprehensive Program Review website. The Regents' Administrative Committee on Effectiveness and Accreditation (RACEA) will conduct spot reviews of all institutional programs. SACS' final recommendations and findings regarding the assessment of general education outcomes (if any) must also be sent to the Assistant Vice Chancellor for Student Achievement.

Learning Goal A1: Communication Outcomes

Examples of learning outcomes that would forward this goal:

- Students produce well-organized communication that meets conventional standards of correctness, exhibits an appropriate style, and presents substantial material.
- Students communicate effectively using appropriate writing conventions.
- Students have the ability to assimilate, analyze, and present in oral and written forms, a body of information.
- Students have the ability to adapt communication to circumstances and audience.
- Students have the ability to interpret content of written materials on related topics from various disciplines.
- Students demonstrate an understanding of what constitutes plagiarism and acknowledge the use of information sources.

Learning Goal A2: Quantitative Outcomes

Examples of learning outcomes that would forward this goal:

- Students have a strong foundation in mathematical concepts, processes, and structure.

- Students effectively apply symbolic representations to model and solve problems.
- Students have the ability to model situations from a variety of settings in generalized mathematical forms.
- Students have the ability to express and manipulate mathematical information, concepts, and thoughts in verbal, numeric, graphical, and symbolic forms while solving a variety of problems.
- Students have the ability to solve multiple-step problems through different (inductive, deductive, and symbolic) modes of reasoning.

Learning Goal B: Institutional Options

System institutions may develop additional learning goals (and their associated outcomes) that fit their respective missions.

Examples of possible additional goals include: collaboration, technology, ethics, civic responsibility and/or civic engagement, and service learning.

Learning Goal C: Humanities, Fine Arts, and Ethics

Examples of learning outcomes that would forward this goal:

- Students can compare and contrast the meaning of major texts from both Western and non-Western cultures.
- Students recognize themselves as participants in a particular culture and see how this affects their experiences and values.
- Students have the ability to make informed judgments about art forms from various cultures including their own culture.
- Students have the ability to recognize the fine arts as expressions of human experience.
- Students have the ability to critically appreciate historical and contemporary fine art forms as they relate to individual and social needs and values.
- Students have the ability to apply knowledge of historical, social, and cultural influences to understanding a work of art.
- Students recognize that an ethical issue is present and can distinguish ethical choices from mere self-interest.
- Students are aware of the ways that culture shapes ethical views and can critically evaluate those views.

Learning Goal D: Natural Sciences, Mathematics, and Technology

Examples of learning outcomes that would forward this goal:

- Students have the ability to understand the physical universe and science's relationship to it.
- Students have the ability to understand the changing nature of science.

Learning Goal E: Social Sciences

Examples of learning outcomes that would forward this goal:

- Students have the ability to describe how historical, economic, political, social, and spatial relationships develop, persist, and change.
- Students have the ability to articulate the complexity of human behavior as a function of the commonality and diversity within groups.

2.4.2 Areas A–F

(Last Modified on July 11, 2016) [Report a broken link](#)

[\(/academic_affairs_handbook/contact_information/\)](/academic_affairs_handbook/contact_information/)

Every institution in the USG will have a core curriculum of precisely 42 semester hours and an Area F of precisely 18 hours. All students must meet the core requirements of the institutions from which they receive their degrees. However, see the rules regarding transfer credit in [Section 2.4.9, Transfer Rules](#)

[\(/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.9_transfer_rul](/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.9_transfer_rul)

Area	Area Name	Description	Hours Required
A1	Communication Outcomes	Courses that address learning outcomes in writing in English	At least 6 hours
A2	Quantitative Outcomes	Courses that address learning outcomes in quantitative reasoning	At least 3 hours
B	Institutional Options	Courses that address general education learning outcomes of the institution's choosing	At least 3 hours

Area	Area Name	Description	Hours Required
C	Humanities, Fine Arts, and Ethics	Courses that address learning outcomes in humanities, fine arts, and ethics	At least 6 hours
D	Natural Science, Mathematics, and Technology	Courses that address learning outcomes in the natural sciences, mathematics, and technology.	At least 7 hours. At least 4 of these hours must be in a lab science course.
E	Social Sciences	Courses that address learning outcomes in the social sciences	At least 6 hours
F	Lower-Division Major Requirements	Lower division courses required by the degree program and courses that are prerequisites to major courses at higher levels.	18 hours

The minimal for Areas D and E are lower than the hours required in these Areas in the 1998 core. This is not intended as a signal that institutions should reduce (or increase) the hours in these areas. The intent is to put this matter in the hands of the faculty of individual institutions by roughly requiring two courses in each of Areas C–E. See [Section 2.4.4](#)

[\(/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.4_details_reg](/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.4_details_reg) for details regarding Area D.

2.4.3 Section Removed

(Last Modified on August 1, 2016) [Report a broken link](#)
[\(/academic_affairs_handbook/contact_information/\)](/academic_affairs_handbook/contact_information/)

This section has been removed due to removal of the “overlay” requirement.

2.4.4 Details Regarding Areas A–F

(Last Modified on August 31, 2016) [Report a broken link](#)

[\(/academic_affairs_handbook/contact_information/\)](/academic_affairs_handbook/contact_information/)

All courses in Areas A–E must be taught at the collegiate level and be broadly focused. They must clearly address the general education learning outcomes of the institution. They must be consistent with the USG’s mission and strategic plan.

Area A1 Communication Skills

If offered, ENGL 1101 and ENGL 1102 must be placed in this area. Other approved courses may be placed in this area. See [Section 2.4.6](#)

[\(/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.6_approval_pr](/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.6_approval_pr) for course approval rules.

Effective Fall 2010, for freshmen entering the USG system Fall 2010, students who have earned 60 hours but have not completed Area A1 must enroll in the next course necessary to make progress toward completing this Area in every semester in which they take classes.

Effective Fall 2011, this hour limit is lowered to 45 hours for freshmen entering the USG system Fall 2011, Spring 2012, and Summer 2012.

Effective Fall 2012, the hour limit is lowered to 30 hours for freshmen entering the USG system Fall 2012 and thereafter.

Institutions are allowed to move to the 45/30 hour limits before they are required to do so. For students with Learning Support requirements in English, taking the required Learning Support course counts as making progress toward completing Area A1.

Area A2 Quantitative Skills

If offered, MATH 1001, MATH 1101, MATH 1111 and MATH 1113 must be placed in this area. MATH 1113 may also be placed in Area D. Other approved courses may be placed in this area. See [Section 2.4.6](#)

[\(/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.6_approval_pr](/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.6_approval_pr) for course approval rules.

For students majoring in mathematics, physics, chemistry, biology, engineering technology, architecture, computer science, geology, geography (B.S.), forestry, pharmacy, physical therapy, secondary science, or mathematics education, pre-calculus must be the required mathematics course in Area A2 at all institutions. In this document, these majors are collectively referred to as “science programs.”

Institutions may require pre-calculus in Area A2 for majors in agricultural science and environmental science. While students may fulfill this requirement with a math course higher than pre-calculus, institutions may not require them to do so.

A calculus course is required in Area A2 for all engineering majors and for all programs at Georgia Institute of Technology. While students may fulfill this requirement with a math course higher than a first course in calculus, institutions may not require them to do so.

At institutions where trigonometry serves as an immediate prerequisite for Calculus I, the completion of trigonometry will be regarded as completion of pre-calculus in Area A2.

Institutions do not need Council on General Education approval to designate a trigonometry course approved for Area A2 as satisfying the pre-calculus standard, but the course catalog and the institution’s listing of Area A2 courses on the Academic Programs website

[\(\[http://www.usg.edu/academic_programs/information/core_curriculum_requirements_for_u\]\(http://www.usg.edu/academic_programs/information/core_curriculum_requirements_for_u\);](http://www.usg.edu/academic_programs/information/core_curriculum_requirements_for_u)

[\(\[http://www.usg.edu/academic_programs/information/core_curriculum_requirements_for_u\]\(http://www.usg.edu/academic_programs/information/core_curriculum_requirements_for_u\);](http://www.usg.edu/academic_programs/information/core_curriculum_requirements_for_u)

should indicate that the trigonometry course in Area A2 meets the pre-calculus requirement.

Symbolic logic and math for liberal arts may not be used as substitutions for algebra or mathematical modeling in Area A2.

Institutions or programs may grant one semester hour of credit for an Area A2 course to count in Area F or in the general degree requirements.

Effective Fall 2010, for freshmen entering the USG system Fall 2010, students who have earned 60 hours but have not completed Area A2 must enroll in the next course necessary to make progress toward completing this Area in every semester in which they take classes.

Effective Fall 2011, this hour limit is lowered to 45 hours for freshmen entering the USG system Fall 2011, Spring 2012, and Summer 2012.

Effective Fall 2012, freshmen entering the USG system Fall 2012 and thereafter, the hour limit is lowered to 30 hours.

Institutions are allowed to move to the 45/30 hour limits before required to do so. For students with Learning Support requirements in mathematics, taking the required Learning Support course counts as making progress toward completing Area A2.

Area B Institutional Options

These courses must include analytical, historical, critical and/or appreciative material.

Area C Humanities, Fine Arts, and Ethics

These courses must include analytical, historical, critical, and/or appreciative material.

Area D Natural Science, Mathematics, and Technology

These courses must be introductory and broadly focused. They must be analytic in nature and have a problem-solving component.

Science programs must require two four-hour laboratory science courses in Area D.

Science programs may specify a higher level math course in Area D.

Given the importance of natural science, mathematics, and technology, any institution that wishes to drop Area D below 10 hours must make a compelling intellectual case that its core proposal will not lead to students' knowing less about the natural sciences, mathematics, and technology than under the current core.

An example of such a compelling case might be if the institution proposed to put 3 or more hours of math in Area B and 7 hours of natural science in Area D.

Institutions may have Area D requirements specific to all science programs, but no science program may require that students take a particular science in Area D. See the rules on prerequisites below.

For example, institutions may not require that chemistry majors complete Area D with chemistry courses.

Creative writing and technical communication courses may not be included in Area D.

Institutions or programs may grant one semester hour of credit for an Area D course to count in Area F or in the general degree requirements.

Students in the health professions, including nursing, must fulfill the Area D science requirement with a two-semester laboratory sequence in either physics, chemistry, or biology. The only biology courses that may be used to fulfill this requirement are Introductory Biology (designed for non-science majors) and Principles of Biology (designed for science majors). The Survey of Chemistry sequence (CHEM 1151 and CHEM 1152) has been designed for the Area D health professions track. Health professions majors have the option of taking the Survey of Chemistry sequence or the sequence appropriate for science majors, but they may not fulfill their Area D requirements with chemistry courses designed for non-science majors.

Non-science majors may use the Survey of Chemistry sequence to fulfill the Area D requirements, but it may not be used to fulfill the science requirements for science majors not in the health professions.

Area E Social Sciences

These courses must include analytical, historical, critical and/or appreciative material. If course work is used to satisfy the U.S./Georgia history and constitutions requirements, these course(s) must be part of Area E.

Area F Lower-Division Major Requirements

This area must be composed exclusively of 1000/2000 level courses. These courses may be prerequisites for other Area F courses and/or for major courses at higher levels.

2.4.5 Rules Regarding Inclusion in Areas A–F

(Last Modified on September 3, 2015) [Report a broken link](#)
(/academic_affairs_handbook/contact_information/)

Every institution must offer a path to completing all Area A–E requirements composed exclusively of 1000 and 2000 level courses. Other approved 3000 and 4000 level courses may also be placed in Areas A–E. See [Section 2.4.6](/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.6_approval_pr) (/academic_affairs_handbook/section2/handbook/2.4_core_curriculum/#p2.4.6_approval_pr) for course approval rules.

Physical education activity/basic health requirements may not be placed in Areas A–F. Up to four hours of physical education activity/basic health courses may be required outside of Areas A–F in excess of the maximum number of hours indicated for undergraduate

degrees. Offerings in physical education/health in excess of the maximum number of hours indicated for undergraduate degrees must be limited to activity, basic health information, first aid, CPR, and safety courses. Transferring students taking physical education/basic health hours at one institution may not be required to duplicate these hours at the receiving institution.

Orientation courses may not be placed in Areas A–F. Up to four hours of orientation courses may be required outside of Areas A–F in excess of the maximum number of hours indicated for undergraduate degrees. Transferring students taking orientation hours at one institution may be required to take additional orientation hours (outside the maximum hours indicated for the undergraduate degree) at the receiving institution.

Courses with a primary emphasis on studio, performance, field study, or internship may not be placed in Areas A–E.

Institutions may decide that the first course in a foreign language falls outside of the maximum number of hours indicated for undergraduate degrees and/or outside of Areas A–F. Institutions that decide that the first course in a foreign language falls outside of the maximum number of hours are not required to grant transfer credit for such courses but may do so if they wish.

Courses in Areas A–F may not carry a fraction of a semester hour of credit.

Except as required by accrediting agencies, core curriculum credits do not have an expiration date.

Institutions may not permit the completion of any course to fulfill requirements in more than one Area A–F. Where the same course is authorized in more than one Area A–F, the student completing the course to meet the requirements of one area must take another course in the second area to meet the requirements of the second area.

2.4.6 Approval Procedures

(Last Modified on August 2, 2016) [Report a broken link](#)
(/academic_affairs_handbook/contact_information/)

Each institution will first submit the courses proposed for Areas A–E to the relevant Academic Advisory Committee and then to the Council on General Education.

Courses previously approved for use in Area A–F at an institution do not require re-approval for use at that institution.

Learning outcomes and courses that are authorized for Area F must be established by the relevant Academic Advisory Committees. Institutions must follow these guidelines when making changes to Area F requirements for their degree programs. Therefore, no approval is needed for institutions to add individual courses to Area F. The respective Academic Advisory Committees must review their Area F guidelines and institutional offerings regularly to ensure institutional compliance with the Advisory Committee-approved guidelines. Advisory Committees will discuss perceived non-compliant Area Fs with the Chief Academic Officer of the impacted institution. If necessary, the matter will be referred to the USG Chief Academic Officer or another Academic Affairs Officer.

Academic Advisory Committees must follow the process described below when making changes to the learning outcomes and course guidelines for their respective Area Fs.

- The proposed changes to Area F guidelines must be approved by the respective Academic Advisory Committee and submitted for consideration by the General Education Council.
- Changes to Area F guidelines must be approved by the Council on General Education and submitted to the Regents Advisory Committee on Academic Affairs (RACAA).
- If approved by RACAA, the Area F changes will be submitted to the Assistant Vice Chancellor for Academic Programs for revision of the academic programs website and implementation in the review of new program proposals.

Form: The form to be used for making changes to Area F Learning Outcomes or Course Guidelines is presented below.

[Proposal for Changes to Area F Learning Outcomes or Course Guidelines 2015.docx \(/assets/academic_affairs_handbook/docs/Proposal_for_Changes_to_Area_F_Learning_Outcomes_or_Course_Guidelines_2015.docx\)](#)

2.4.7 Prerequisites and Exceptions

(Last Modified on September 3, 2015) [Report a broken link \(/academic_affairs_handbook/contact_information/\)](#)

Courses in one area (A–E) may be prerequisites for other courses in that area.

Except as noted below,

- No course in Area A–E may be a prerequisite for any course outside Areas A–E
- No course in one area (A–E) may be a prerequisite for any course in any other area (A–E).

Exception 1

If one particular course is required in order to complete an Area, that course may be a prerequisite for a course in another Area or for a course outside of Area A–E.

Exception 2

Degree programs may add courses in Areas A–E to their Area Fs. Students in such degree programs will receive credit for the course in Area F, and this course may be a prerequisite for courses in Area F or the major. Unless required of all students in Area B or C, any foreign language courses approved for inclusion in Areas A – E must also be included in Area F for majors requiring foreign languages, so that foreign language courses included in Areas A – E do not become required prerequisites for Area F courses.

Exception 3

Institutions may require their students to complete their A2 requirements before taking math courses in Areas D and F. They may do so by making their A2 courses prerequisites for their math courses in Areas D and F.

Exception 4

A course that, according to an institution's 2008–2009 catalog, appears in Area A–E (but not in Area F) and is a prerequisite for a course outside of Area A–E may remain a prerequisite for that course and remain in the core.

Exception 5

Institutions may apply for permission to specify that students in one or more of their degree programs are required to take particular courses within Areas A–E. Institutions may apply for up to 9 hours of such requirements. If permission is granted, these courses may be prerequisites for courses in Area F or in the major's degree requirements.

Applications will be considered first by the relevant Academic Advisory Committees (the advisory committee for the degree program and the advisory committee for course), then by the Regents' Administrative Committee on Academic Affairs (RACAA), then by the Council on General Education (Gen Ed Council). The Gen Ed Council will make a recommendation to the Executive Vice Chancellor and Chief Academic Officer of the USG.

Applications will be considered only if requiring particular courses in Areas A–E will allow the degree program to reduce the number of hours required for the degree.

In evaluating such requests RACAA and the Gen Ed Council will consider the following criteria:

- The degree program is in an area in which demand for graduates in Georgia significantly outstrips the supply,
- The degree program requires a special admission process beyond that required for admission to the institution,
- The degree program has an accreditation body that requires so many hours it is difficult to design a degree program that is 120 hours without requiring particular courses in Areas A–E, and
- Graduates of the degree program must pass a certification or licensure exam before they can exercise the relevant profession.

The courses required in Areas A–E must be available to and count in Areas A–E for all students, not just those in the degree program.

Some Examples:

- PHIL 2010 is in Area C at Winder State. It is one of many courses in Area C and is not required in the philosophy Area F and is a prerequisite for upper-level philosophy courses. This is not allowed.
- PHIL 2010 is in Area C at Decatur State. It is also required in the philosophy Area F and is a prerequisite for upper-level philosophy courses. Philosophy majors receive credit for PHIL 2010 in Area F and must take other courses to fulfill their Area C requirements. This is allowed.
- Moultrie State requires ENGL 1101 and 1102 in Area A1. ENGL 1101 is a prerequisite for ENGL 1102. This is allowed.

- Jesup State requires all students to take ENGL 1102 in Area A1. ENGL 1102 is a prerequisite for ENGL 2110 and ENGL 2110 is in Area C. This is allowed.
- Seneca State requires nine hours in Area A1—ENGL 1101, ENGL 1102, and one of the following four courses: ENGL 1105, Writing in the Humanities, ENGL 1106, Writing in the Fine Arts, ENGL 1107, Writing in the Natural Sciences, ENGL 1108, Writing in the Social Sciences. ENGL 1105 is a prerequisite for PHIL 2010 in Area C. This is not allowed.
- Seneca State’s nursing program wants to move from 123 to 120 hours. To do so, they propose to require all nursing students to take a new course, PSYCH 1234, in Area E. PSYCH 1234 is approved for use in the core according to the procedures noted in Exception 5 and counts towards Area E for all students. This is allowed.

2.4.8 Rules for Change of Major

(Last Modified on April 12, 2011) [Report a broken link](#)
(/academic_affairs_handbook/contact_information/)

Students switching from a non-science major to a science major must meet the Area A2 and Area D requirements for science majors even if they have already completed the Area A2 and Area D requirements for non-science majors.

2.4.9 Transfer Rules

(Last Modified on July 11, 2016) [Report a broken link](#)
(/academic_affairs_handbook/contact_information/)

Students in the USG must declare one home institution at a time. Students who transfer from one institution to another automatically change their home institution.

Students must meet the USG-specified minimum number of hours in each Area A–E.

Students successfully completing a course in one institution’s Areas A–E will receive full credit in Areas A–E for the course upon transfer to another USG institution as long as the following conditions are met:

- The course is within the Area hours limitations of either the sending institution or the receiving institution and
- The student does not change from a non-science major to a science major

An Example to Illustrate Cross-Area Transfer Credit

	Decatur State	Winder State	Moultrie State
Area A1	6 hours	6 hours	6 hours
Area A2	3 hours	3 hours	3 hours
Area B	3 hours	3 hours	3 hours
Area C	12 hours	9 hours	9 hours
Area D	9 hours	12 hours	9 hours
Area E	9 hours	9 hours	12 hours
Total	42 hours	42 hours	42 hours

A student transferring from Decatur State to Winder State having completed the Decatur State core must be given credit in Area D (Natural Science) for the 3 excess hours of work done in Area C (Humanities, Fine Arts, and Ethics). If a student took 12 hours of Area E (Social Science) courses at Decatur State, only nine of those hours would transfer to Winder State but all 12 would transfer to Moultrie State.

Students successfully completing a course in one institution's Area F will receive full credit for the course upon transferring to another USG institution as long as the student retains the same major.

Receiving institutions may require transfer students to complete the requirements as specified for native students. However, the total number of hours required of transfer students for the degree must not exceed the number of hours required of native students for the same major.

Students who wish to take Area A–F courses (including distance learning courses) from a USG institution other than the home institution, either concurrently or intermittently, may receive transient permission to take and receive credit for Areas A–F courses satisfying home institution Area A–F requirements.

Provided that native and transfer students are treated equally, institutions may impose

additional reasonable expectations, such as a grade of “C” in Area A–F courses.

Chief Transfer Officer

Each institution will designate a Chief Transfer Officer (CTO) to facilitate the transfer of students within the USG. The CTO must have senior administrative and/or faculty status. The CTO is the contact person for students, faculty, advisors, records and admissions personnel, and academic administrators when problems related to transfer of Area A–F course work across USG institutions occur. However, CTOs should also be proactive and work to develop institutional procedures that minimize transfer problems.

Students with questions or concerns about the transfer of credit between USG institutions should contact the CTO at the receiving institution.

2.4.10 Common Course Prefixes, Numbers, and Descriptions

(Last Modified on March 10, 2016) [Report a broken link](#)

[\(/academic_affairs_handbook/contact_information/\)](/academic_affairs_handbook/contact_information/)

SOURCES:

MEMORANDA FROM SENIOR VICE CHANCELLOR FOR ACADEMIC AFFAIRS, 5/2/1997; 5/23/1997; 6/3/1997; 6/30/1997; AND 11/19/1997 (APPROVED 6/1/1997, FOR IMPLEMENTATION WITH SEMESTER CONVERSION)

Following are common course prefixes, numbers, and descriptions that all institutions shall use for their programs of study.

Course Prefix and Number	Course Name	Course Description
ACCT 2101	Principles of Accounting I	A study of the underlying theory and application of financial accounting concepts.
ACCT 2102	Principles of Accounting II	A study of the underlying theory and application of managerial accounting concepts.

ANTH 1102	Introduction to Anthropology	
ANTH 1103	Introduction to Social Anthropology	
ANTH 1104	Introduction to Archaeology	
ANTH 1105	Introduction to Physical Anthropology	
ANTH 1106	Introduction to Cultural Diversity	
ART	See Fine and Applied Arts	
ASTR 1000	Introduction to the Universe	A survey of the universe, examining the historical origins of astronomy; the motions and physical properties of the Sun, Moon, and planets; the formation, evolution, and death of stars; and the structure of galaxies and the expansion of the universe.
ASTR 1010	Astronomy of the Solar System	Astronomy from early ideas of the cosmos to modern observational techniques. The solar system planets, satellites, and minor bodies. The origin and evolution of the solar system.
ASTR 1020	Stellar and Galactic Astronomy	The study of the Sun and stars, their physical properties and evolution, interstellar matter, star clusters, our galaxy and other galaxies, and the origin and evolution of the Universe.

Biology

For science courses in biology, chemistry, and physics, the sequences designed for non-science majors will be entitled “Introductory Biology, Introductory Chemistry, and Introductory Physics.”

The sequences designed for science majors will be entitled “Principles of Biology, Principles of Chemistry, and Principles of Physics.”

Combined lecture/lab courses should be indicated with a “K” suffix, and stand-alone lab courses should be indicated with an “L” suffix. The approved course descriptions shown for chemistry illustrate the use of the suffixes.

The Principles of Biology sequence will be numbered BIOL 1107 and 1108 (or BIOL 2107 and 2108 for institutions offering the courses in the second year).

BUS 1105	Introduction to Business	An integrative study of the functional areas of business (finance, operations, marketing, human resources, etc.)
BUS 2105	Communicating in the Business Environment	A course emphasizing both interpersonal and organizational communications; to include written and oral exercises appropriate to business practice.
BUS 2106	The Environment of Business	An introduction to the legal, regulatory, political, social, ethical, cultural environmental and technological issues which form the context for business; to include an overview of the impact and demographic diversity on organizations.

		For science courses in biology, chemistry, and physics, the sequences designed for non-science majors will be entitled "Introductory Biology, Introductory Chemistry, and Introductory Physics."
Chemistry		The sequences designed for science majors will be entitled "Principles of Biology, Principles of Chemistry, and Principles of Physics." Combined lecture/lab courses should be indicated with a "K" suffix, and stand-alone lab courses should be indicated with an "L" suffix.
CHEM 1100	Introductory Chemistry	A one-semester course covering basic concepts and applications of chemistry designed for non-science majors. There is no laboratory component.
CHEM 1101K	Introductory Chemistry I	First course in a two-semester sequence covering the basic principles and applications of chemistry designed for non-science majors. Topics to be covered include atomic structure and isotopes, periodicity and chemical equations. Laboratory exercises supplement the lecture material.
CHEM 1102K	Introductory Chemistry II	Second course in a two-semester sequence covering the basic principles and applications of chemistry designed for non-science majors. Laboratory exercises supplement the lecture material.
CHEM 1101	Introductory Chemistry I	First course in a two-semester sequence covering the basic principles and applications of chemistry designed for non-science majors. Topics to be covered include atomic structure and isotopes, periodicity and chemical equations.

CHEM 1101L	Introductory Chemistry Laboratory I	Laboratory exercises supplement the lecture material of CHEM 1101.
CHEM 1102	Introductory Chemistry II	Second course in a two-semester sequence covering the basic principles and applications of chemistry designed for non-science majors.
CHEM 1102L	Introductory Chemistry Laboratory II	Laboratory exercises supplement the lecture material of CHEM 1102.
CHEM 1151K	Survey of Chemistry I	First course in a two-semester sequence covering elementary principles of general, organic and biochemistry designed for allied health professions majors. Topics to be covered include elements and compounds, chemical equations, nomenclature, and molecular geometry. Laboratory exercises supplement the lecture material.
CHEM 1152K	Survey of Chemistry II	Second course in a two-semester sequence covering elementary principles of general, organic and biochemistry designed for allied health professions majors. Laboratory exercises supplement the lecture material.
CHEM 1151	Survey of Chemistry I	First course in a two-semester sequence covering elementary principles of general, organic and biochemistry designed for allied health professions majors. Topics to be covered include elements and compounds, chemical equations, nomenclature, and molecular geometry.

CHEM 1151L	Survey of Chemistry Laboratory I	Laboratory exercises supplement the lecture material of CHEM 1151.
CHEM 1152	Survey of Chemistry II	Second course in a two-semester sequence covering elementary principles of general, organic and biochemistry designed for allied health professions majors.
CHEM 1152L	Survey of Chemistry Laboratory II	Laboratory exercises supplement the lecture material of CHEM 1152.
CHEM 1211K	Principles of Chemistry I	First course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors. Topics to be covered include composition of matter, stoichiometry, periodic relations, and nomenclature. Laboratory exercises supplement the lecture material.
CHEM 1212K	Principles of Chemistry II	Second course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors. Laboratory exercises supplement the lecture material.
CHEM 1211	Principles of Chemistry I	First course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors. Topics to be covered include composition of matter, stoichiometry, periodic relations, and nomenclature.
CHEM 1211L	Principles of Chemistry Laboratory I	Laboratory exercises supplement the lecture material of CHEM 1211.

CHEM 1212	Principles of Chemistry II	Second course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors.
CHEM 1212L	Principles of Chemistry Laboratory II	Laboratory exercises supplement the lecture material of CHEM 1212.
COM	See Fine and Applied Arts	
CSCI 1301	Computer Science I	The course includes an overview of computers and programming; problem solving and algorithm development; simple data types; arithmetic and logic operators; selection structures; repetition structures; text files; arrays (one-and-two-dimensional); procedural abstraction and software design; modular programming (including subprograms or the equivalent).
CSCI 1302	Computer Science II	The course includes an overview of abstract data types (ADTs); arrays (multi-dimensional) and records; sets and strings; binary files; searching and sorting; introductory algorithm analysis (including Big-O); recursion; pointers and linked lists; software engineering concepts; dynamic data structures (stacks, queues, trees).
ECON 2105	Principles of Macroeconomics	This principles of economics course is intended to introduce students to concepts that will enable them to understand and analyze economic aggregates and evaluate economic policies.

ECON 2106	Principles of Microeconomics	This principles of economics course is intended to introduce students to concepts that will enable them to understand and analyze structure and performance of the market economy.
ENGL 1101	English Composition I	A composition course focusing on skills required for effective writing in a variety of contexts, with emphasis on exposition, analysis, and argumentation, and also including introductory use of a variety of research skills.
ENGL 1102	English Composition II	A composition course that develops writing skills beyond the levels of proficiency required by ENGL 1101, that emphasizes interpretation and evaluation, and that incorporates a variety of more advanced research methods.
ENGL 2110	World Literature (one course only)	A survey of important works of world literature.
ENGL 2111	World Literature I (as part of a two-course sequence or option)	A survey of important works of world literature from ancient times through the mid-seventeenth century.
ENGL 2112	World Literature II (as part of two-course sequence or option)	A survey of important works of world literature from the mid-seventeenth century to the present.
ENGL 2120	British Literature (one course only)	A survey of important works of British literature.
ENGL 2121	British Literature I (as part of two-course sequence or option)	A survey of important works of British literature from the Old English period through the neoclassical age.

ENGL 2122	British Literature II (as part of two-course sequence or option)	A survey of important works of British literature from the Romantic era to the present.
ENGL 2130	American Literature (one course only)	A survey of important works of American literature.
ENGL 2131	American Literature I (as part of two-course sequence or option)	A survey of American literature from the pre colonial age to the mid-nineteenth century.
ENGL 2132	American Literature II (as part of two-course sequence or option)	A survey of American literature from the mid nineteenth century to the present.

**Course Prefix
and Number**

Course Name

Course Description

Fine and Applied Arts

ART	The Visual Art Common Prefix for Area C and Area F courses is ART (with the fourth letter being an institutional prerogative).	
ART 1010	Drawing I	Introduction to the techniques, materials and principles of drawing.
ART 1011	Drawing II	Techniques, materials and principles of drawing.
ART 1020	Two Dimensional Design	The fundamentals of two dimensional design introduced through projects in a variety of media.
ART 1030	Three Dimensional Design	An investigation of three dimensional forms and space using various materials and methods.

COMM 1100	Human Communication	A broad approach to oral communication skills including intrapersonal, interpersonal, small group, and public speaking
COMM 1110	Public Speaking	The organization of materials and the vocal and physical aspects of delivery in various speaking situations.
MUSC 1100	Music Appreciation (or equivalent)	Introduction to Music History and literature.
MUSC 1080 or 2080	Band (or equivalent)	Study, rehearsal, and concert performance or literature for band.
MUSC 1090 or 2090	Choir (or equivalent)	Study, rehearsal, and concert performance of literature for choir.
THEA 1100	Theatre Appreciation	Survey and critical appreciation of Theatre.

Foreign Language Courses

___ 1001	1st semester elementary course (This course will not meet degree requirements at some USG institutions.)
___ 1002	2nd semester elementary course
___ 2001	1st semester intermediate course
___ 2002	2nd semester intermediate course

FREN 1001	Elementary French I	Introduction to listening, speaking, reading, and writing in French and to the culture of French-speaking regions.
FREN 1002	Elementary French II	Continued listening, speaking, reading and writing in French with further study of the culture of French-speaking regions.
GREK 1001	Elementary Greek	Introduction to the grammar, reading, and translation of Classical Attic Greek.
GREK 1002	Elementary Greek II	Continued study of the grammar of Classical Attic Greek begun in GREK 1001, with further reading and translation.
GRMN 1001	Elementary German I	An introduction to the German language and the culture of the German-speaking world. Beginning of a survey of basic German grammar and the grammar and the development of the four language skills of listening, speaking, reading, and writing German. Some aspects of everyday life in the German-speaking world will also be introduced. [INSTITUTIONAL OPTION: Work with other media (audio, video, and/or computer) outside of class is required.]

GRMN 1002	Elementary German II	The second part of an introduction to the German language and the culture of the German-speaking world. Completion of the survey of basic German grammar and further development of the four language skills of listening, speaking, reading, and writing German. Aspects of everyday life in the German-speaking world will also be introduced. [INSTITUTIONAL OPTION: Work with other media(audio, video, and/or computer) outside of class is required.]
ITAL 1001	Elementary Italian I	Introduction to listening, speaking, reading and writing in Italian and to the culture of Italian-speaking regions.
ITAL 1002	Elementary Italian II	Continued listening, speaking, reading and writing in Italian with further study of the culture of Italian-speaking regions.
LATN 1001	Elementary Latin I	Introduction to the Latin language: pronunciation, fundamentals of grammar, reading, and translation.
LATN 1002	Elementary Latin II	Continued study of Latin grammar and syntax begun in LATN 1001, with further reading and translation.
PORT 1001	Elementary Portuguese I	Introduction to listening, speaking, reading and writing Portuguese and to the culture of Portuguese-speaking regions.
PORT 1002	Elementary Portuguese II	Continued listening, speaking, reading and writing in Portuguese with further study of the culture of Portuguese-speaking regions.

SPAN 1001	Elementary Spanish I	Introduction to listening, speaking, reading and writing in Spanish and to the culture of Spanish-speaking regions.
SPAN 1002	Elementary Spanish II	Continued listening, speaking, reading and writing in Spanish with further study of the culture of Spanish-speaking regions.

Other Foreign Language Prefixes

ARAB	Arabic
CHIN	Chinese
FARS	Farsi
HEBR	Hebrew
JAPN	Japanese
NORW	Norwegian
RUSS	Russian
YORU	Yoruba

Geography

GEOG 1101	Introduction to Human Geography	A survey of global patterns of resources, population, culture, and economic systems. Emphasis is placed upon the factors contributing to these patterns and the distinctions between the technologically advanced and less advanced regions of the world.
-----------	---------------------------------	---

GEOG 1103	Geographic Perspectives on Multiculturalism in the U.S.	Geographic factors underlying multiculturalism and ethnic relationships in the United States. Three interrelated themes are emphasized: the spatial development and organization of culture; population growth, migration, and urbanization; and the spatial dimensions of political, economic, and social processes.
GEOG 1111	Introduction to Physical Geography (Earth Science Survey)	An introduction to physical geography, surveying climate, vegetation, soils, landforms, and water resources in their areal interrelations and distributions.
GEOG 1112	Introduction to Weather and Climate (3 credits lecture, 1 credit for optional lab, or 4 credits if combined)	Components of weather processes, and their measurement. Climatic elements and their control factors. Geographic classification of climatic and vegetative types on the Earth's surface.
GEOG 1113	Introduction to Landforms (3 credits lecture, 1 credit for optional lab, or 4 credits if combined)	Introductory analysis and classification of major types of land surfaces, stressing geographic characteristics. Study and interpretation of relationships between landforms and other phenomena through maps, air photos, and field observations. World coverage with stress on North America.

GEOG 1125 **Resources, Society, and the Environment**

Interactions between physical systems and human activities, and their effects on environmental quality and sustainability are emphasized. Topics include: geography of population and resource consumption, food production, water and air quality, energy policy, land/biotic resource management. Contrasting social, ethical, and technological perspectives on environmental concerns are explored.

GEOL 1121 **Introductory Geosciences I (institutional option name, such as Physical Geology)**

This course covers Earth materials and processes.

GEOL 1122 **Introductory Geosciences II (institutional option name, such as Historical Geology)**

This course covers geologic time, sedimentary environments, fossils, and Earth history.

History The numbers and content of history courses depend on whether the courses are taught as one, two, or three-semester versions.

Survey of World History/Civilization (One-semester version)

HIST 1100 A thematic survey of World History to the present era.

Survey of World History/Civilization (Two-semester version)

HIST 1111 A survey of World History to early modern times.

HIST 1112	A survey of World History from early modern times to the present.
Survey of World History/Civilization (Three-semester version)	
HIST 1011	A survey of World History to the post-classical period.
HIST 1012	A survey of World History from the post-classical to early modern times.
HIST 1013	A survey of World History from early modern times to the present.
Survey of Western Civilization (One-semester version)	
HIST 1120	A thematic survey of Western Civilization to the present.
Survey of Western Civilization (Two-semester version)	
HIST 1121	A survey of Western Civilization to early modern times.
HIST 1122	A survey of Western Civilization from early modern times to the present.
Survey of Western Civilization (Three-semester version)	
HIST 1021	A survey of Western Civilization to the medieval period.
HIST 1022	A survey of Western Civilization from medieval to early modern times.
HIST 1023	A survey of Western Civilization from early modern times to the present.
Survey of U.S. History (One-semester version)	

HIST 2110 A thematic survey of U.S. History to the present.

Survey of U.S. History (Two-semester version)

HIST 2111 A survey of U.S. History to the post-Civil War period.

HIST 2112 A survey of U.S. History from the post-Civil War period to the present.

Learning Support Courses

Learning Support courses with numbers ranging from 0096 to 0099 should not be offered after summer of 2015. Reading will not be offered as a separate course after summer of 2015. No later than fall of 2015, all Learning Support courses will have numbers in the 0987 to 0999 range and will match the descriptions listed below.

English

ENGL 0989 Foundations for English Composition This is the first course in a year-long pathway leading to ENGL 0999 and ENGL 1101 in the second semester.

ENGL 0999 Support for English Composition This course is intended to provide corequisite support for students requiring remediation in English or reading while they are enrolled in ENGL 1101 – English Composition I

Mathematics

MATH 0987 Foundations for Quantitative Reasoning This is the first course in a year-long pathway leading to MATH 0997 and MATH 1001 in the second semester.

MATH 0988 Foundations for Mathematical Modeling This is the first course in a year-long pathway leading to MATH 0998 and MATH 1101 in the second semester.

MATH 0989	Foundations for College Algebra	This is the first course in a year-long pathway leading to MATH 0999 and MATH 1111 in the second semester.
MATH 0997	Support for Quantitative Reasoning	This course is intended to provide corequisite support for students requiring remediation in mathematics while they are enrolled in MATH 1001 – Quantitative Reasoning
MATH 0998	Support for Mathematical Modeling	This course is intended to provide corequisite support for students requiring remediation in mathematics while they are enrolled in MATH 1101 – Introduction to Mathematical Modeling
MATH 0999	Support for College Algebra	This course is intended to provide corequisite support for students requiring remediation in mathematics while they are enrolled in MATH 1111 – College Algebra

Learning Support courses NOT to be offered after Summer 2015

English

ENGL 0096	Non exit level course
ENGL 0097	Non exit level course
ENGL 0098	Second exit level course (if applicable)
ENGL 0099	Exit level

Mathematics

MATH 0096	Non exit level course
MATH 0097	Non exit level course

MATH 0098	Second exit level course (if applicable)
MATH 0099	Exit level course
Reading	
READ 0096	Non exit level course
READ 0097	Non exit level course
READ 0098	Second exit level course (if applicable)
READ 0099	Exit level course

Course Prefix and Number	Course Name	Course Description
-------------------------------------	--------------------	---------------------------

MATH 1001	Quantitative Reasoning	This course emphasizes quantitative reasoning skills needed for informed citizens to understand the world around them. Topics include logic, basic probability, data analysis and modeling from data.
-----------	------------------------	---

MATH 1101	Introduction to Mathematical Modeling	This course is an introduction to mathematical modeling using graphical, numerical, symbolic, and verbal techniques to describe and explore real-world data and phenomena. Emphasis is on the use of elementary functions to investigate and analyze applied problems and questions, supported by the use of appropriate technology, and on effective communication of quantitative concepts and results.
-----------	---------------------------------------	---

MATH 1111	College Algebra	This course provides an in-depth study of the properties of algebraic, exponential and logarithmic functions as needed for calculus. Emphasis is on using algebraic and graphical techniques for solving problems involving linear, quadratic, piece-wise defined, rational, polynomial, exponential and logarithmic functions.
MATH 1112	College Trigonometry	This course is an in-depth study of the properties of trigonometric functions and their inverses. Topics include circular functions, special angles, solutions of triangles, trigonometric identities and equations, graphs of trigonometric functions, inverse trigonometric functions and their graphs, Law of Sines, Law of Cosines, and vectors.
MATH 1113	Pre-calculus	This course is an intensive study of the basic functions needed for the study of calculus. Topics include algebraic, functional, and graphical techniques for solving problems with algebraic, exponential, logarithmic, and trigonometric functions and their inverses.
MUSC	See Fine and Applied Arts.	
PHIL 1010	Specific course name not specified but this number is to be used for 2 credit-hour critical thinking courses.	Specific course description not specified.

PHIL 2010	Specific course name not specified but this number is to be used for 3 credit introduction to philosophy courses.	Specific course description not specified.
PHIL 2020	Specific course name not specified but this number is to be used for 3 credit hours critical thinking courses.	Specific course description not specified.
PHIL 2030	Specific course name not specified but this number is to be used for 3 credit hour introduction to ethics courses.	Specific course description not specified.
PHIL 2040	Specific course name not specified but this number is to be used for 3 credit hour introduction to philosophy of art courses.	Specific course description not specified.
PHIL 2500	Specific course name not specified but this number is to be used for 3 credit hour symbolic logic courses.	Specific course description not specified.

Physics

For science courses in biology, chemistry, and physics, the sequences designed for non-science majors will be entitled “Introductory Biology, Introductory Chemistry, and Introductory Physics.”

The sequences designed for science majors will be entitled “Principles of Biology, Principles of Chemistry, and Principles of Physics”.

Combined lecture/lab courses should be indicated with a “K” suffix, and stand-alone lab courses should be indicated with an “L” suffix.

The approved course descriptions shown for chemistry illustrate the use of the suffixes.

PHYS 1111	Introductory Physics I	An introductory course which will include mechanics (kinematics, dynamics, work and energy, momentum and collisions, and rotational motion and statics), and may also include thermodynamics and waves. Elementary algebra and trigonometry will be used.
PHYS 1112	Introductory Physics II	An introductory course which will include electrostatics, electric current and circuits, and electromagnetism, and may also include optics and modern physics, Elementary algebra and trigonometry will be used.
PHYS 1211 or 2211	Principles of Physics I (1000 or 2000 level to be specified by institution)	An introductory course which will include mechanics (kinematics, dynamics, work and energy, momentum and collisions, and rotational motion and statics), and may also include thermodynamics and waves. Elementary calculus will be used.
PHYS 1212 or 2212	Principles of Physics II (level 1 or 2 to be specified by institution)	An introductory course which will include electrostatics, electric current and circuits, and electromagnetism, and may also include optics and modern physics. Elementary calculus will be used.

PHSC or PHYS 1011	Physical Science I	PHSC or PHYS is the recommended prefix for common physical science courses that are developed. To date, there are no common physical science courses.
PHSC or PHYS 1012	Physical Science II	
POLS 1101	American Government	
POLS 2101	Introduction to Political Science	
POLS 2201	State and Local Government	
POLS 2301	Introduction to Comparative Politics	
POLS 2401	Global Issues	
POLS 2501	Domestic Issues	
POLS 2601	Introduction to Public Administration	
PSYC 1101	Introduction to General Psychology (Institutional option for name addendum - e.g. Principles I)	A broad survey of the major topics in psychology including, but not limited to, research methodology, biological and social factors influencing behavior, development, learning, memory, personality, and abnormal.
PSYC 2101	Introduction to the Psychology of Adjustment (Institutional option for name addendum)	An introductory examination of the applied psychological theory and research concerning mental health and well being.

PSYC 2103	Introduction to Human Development (Institutional option for name addendum)	An introductory, non-laboratory based examination of human development across the lifespan with an emphasis on normal patterns of physical, cognitive, and social development.
-----------	---	--

Regents Test Remediation courses

RGTE 0199 Essay

RGTR 0198 Reading

Other Regents Test courses

RGTE 0197 Essay

RGTR 0196 Reading

SOCI 1101	Introduction to Sociology	A survey of the discipline of sociology. Topics will include sociological theory, methods and selected substantive area.
SOCI 1160	Introduction to Social Problems	A theoretical and empirical analysis of selected major social problems confronting American society.
SOCI 2293	Introduction to Marriage and Family	An introduction to the structure, processes, problems and adjustments of contemporary marriage and family life.
